

Creek Community Gardeners

Mission

To contribute to community building, healthy eating, and active living, by creating and operating community gardens in the South False Creek/Fairview area.

Vision

The community garden is intended to:

- be a peaceful place for residents to grow plants, where people welcome, look out for, and learn from each other.
- be shared primarily by people living in the South False Creek and Fairview neighbourhoods.
- consist mostly of personal plots, with some shared areas.
- include primarily vegetable gardening, with some ornamentals, and herbs.
- to be operated in a healthy, natural, sustainable manner, using organic growing methods.
- to be inclusive and accessible by everybody, including those with physical and financial limitations.
